RICHMOND, CALIFORNIA, FRIDAY, NOVEMBER 10, 1922

No. 45

Congress Republican By Narrow Margin

Control of Next House Looked Dubious Day After

Washington, Nov. 10.—Latest figures show that the house will stand as follows:
Republican 220.
Democrats 210.
Socialists 1.
Independents 1.
In the senate the republican margin will be 8, possibly 10, depending on Utah and North Dakota contests.
The landslide seems to be general all over the country and, it is said will equal the republican landslide of 1920.

Some of the Winners

Friend W. Richardson elected governor by a majority of 150,000.
C. C. Young elected lieutenant-governor by a majority of over 250,000.
Hiram W. Johnson received a majority over Pearson of approximately 250,000.
The following amendments won: Chiropractic and Osteopathy acts. Absent voters. Veterans' validating and bond measures.
State budget. Consolidation measures.
The following acts were defeated: Water and Power act. State Land Settlement bond issue. Wright Prohibition Enforcement act. State Housing act. The Sample "lawyers' bill." Only 12 out of the 30 amendments carried.

A MISLEADING PHRASE
"Miss Founders," said Mr. Dubois to his stenographer, "I wish you would quit saying, 'I'll tell the world.'"
"Do you object to slang, Mr. Dubois?"
"Not as a general rule, but the frequent use of that expression doesn't seem quite proper in a young woman who takes a great deal of correspondence marked 'Private' and 'Confidential.'—Birmingham Age-Herald.

THE TERMINAL can print it for you. Call up Richmond 132. Print shop at 288 Macdonald.

Election Results Up to Latest Radio Reports

Tuesday's election is past history, and although there were the usual disappointments, on the contrary an equal number were happy by putting their favorite candidates over.
Contra Costa county followed in the Republican column, with the usual substantial majority for state and county tickets.
The local fight in Contra Costa was on the sheriff, and everybody knows that the incumbent is the man for the place, and so declared themselves at the polls. That's all there is to it.

They Went to Polls on Snow Shoes

McCloud, Nov. 10.—Many residents of the mountain districts in Siskiyou and other northern counties were compelled to wear snow shoes Tuesday when they went to the polls to vote. The heavy snow storm was a record breaker for November.

THE OCCULT DETECTIVE

In an effort to discover who threw the bomb into a banquet hall in Budapest on April 2, killing 18 men and wounding many others, Dr. Francis Volgesi, the chief police medical officer, employed a young male medium and hypnotized him. In his trance he gave the names of two persons, who have been identified by detectives and against whom the latter say there is evidence.

Words of Appreciation and Thanks

Sheriff R. R. Veale, through The Terminal, wishes to thank his friends who supported him in his recent contest for sheriff of Contra Costa county. He says: "It is with the deepest gratitude and appreciation I thank the many loyal supporters of my candidacy for sheriff, those who have been loyal and true the many years I have been their public servant in the sheriff's office. May I always be held in that high esteem, and merit the confidence and honor bestowed upon me by the people of Contra Costa county. Sincerely, R. R. Veale. Martinez, Nov. 9, 1922.

Five Thousand Women Parade For Law Enforcement

San Francisco, Nov. 9.—The attractive and impressive parade of last Saturday, when five thousand women with "Allegiance" banners, and dressed in white, representing surrounding towns and cities, marched from the ferry building to the civic center, where all participants took the oath of allegiance to vote yes on the Wright law, did not seem to make an impression on "wet" San Francisco. The enforcement act was "snowed" under by approximately 36,000.

Election Echoes

The day after election—did you notice how quiet it was? The usual fireworks and demonstrations were absent. The people are thinking.

Although the democrats came back and heavily succeeded in changing the complexion of congress, prosperous times will continue with President Harding in the Pilot House.

Andy Gump, although not elected, made a good run. As an advertising medium, Andy made the windshield hit of the campaign.

Old Si says: "They're always going to beat Veale, but he gets elected just the same."

There wasn't any question or doubt as to what the people would do to the water power act. It received a "hammer blow."

Senator Hiram Johnson is a 4 to 1 winner over Pearson, in the contest for U. S. Senator.

Amendment No. 19 lost out 3 to 1 in Contra Costa county.

Willie Veale, modest and retiring, was never thought of as a campaign orator. Now that the undersheriff has "found himself," why not send him to Sacramento or Washington, instead of his chasing criminals, bootleggers and others of the lawbreaking genre. Keep your eye on Willie Veale. He's a spell-binder, and a good one.

It is often remarked that a write-in candidate has a small chance of election. From recent county returns it is not best to be cocksure on this point.

Sheriff Veale made third base in the primaries and only needed a "pinch hit" to bring him in. The people made it a "home run"—at the general election.

Ira Vaughn, the write-in candidate, received several gross of complimentary votes, which came unsolicited, as Ira has an office, that of city treasurer, and says one is enough at present. But the political weather-vane seems to be pointing his way.

The "nailing of campaign lies" will be taken from the table again in the spring of 1926.

Tony Reggiardo, defeated candidate for sheriff, must be considered as a "formidable foe" in the recent contest for sheriff. He put up a stiff fight, and although he lost, he must be given credit for being the only "adversary" of the little general in 28 years who had the latter "guessing."

Polse may be an essential qualification in a candidate on certain occasions, but the pangs of defeat have a tendency to knock all the polse "outer a feller."

Entire City Council Now Favors Charter Election

After many preliminaries and political "obstructions" the people of Richmond will be given a chance to vote on a new charter. This was decided upon Monday evening when the council instructed City Attorney Hall to prepare a resolution calling an election for December 12.

The motion to call the election was made by Mrs. Ogborn, seconded by Councilman Platte. Councilman Hartnett stated that if the proponents of the charter were satisfied their petition was legal, he was satisfied to call the election. All members voted in favor of the motion.

The informal opinion of the superior judges was to the effect that the former petition was sufficient. On the question of the certificate that was attached to it by the county clerk, the judges were of the opinion that official had no right to go behind the names.

The Richmond Charter League decided not to test the validity of its former petition to call an election and new petitions have been prepared and signed.

To obviate entanglements, the signers should affix the date of signing opposite their names.

It now looks like the charter of the city of Richmond will be revised and that no obstacles will prevent the charter league in submitting the question to the people.

MARSH IN HIS JUDGMENT

Traveler Evidently Was Pleased at Seeming Unfriendliness of Pioneer Circuit Rider.

In the early sixties the West immediately on the other side of the Mississippi river was sparsely settled. A traveler in this country met few persons in the course of a day's journey, and so, as a rule, welcomed the appearance of a stranger, especially if the stranger was a congenial traveling companion. These were times, too, when Mr. Volstead would have been unpopular, when every happy pioneer kept twists of home-grown long green in his jeans and a flask of unadulterated "red likker" about his person.

It was in such a day that a pioneer circuit rider was making his way cross-country on a new circuit. Encountering a native traveling in the same direction, he hailed him. The stranger seemed pleased to welcome a companion, and at once offered hospitality in the form of a flask. On the minister's refusal to imbibe the spirits, a "chaw" from an ample twist was offered. This also was politely declined, whereat the native turned on him abruptly and asked an astonishing question: "Might ye eat hay, then?" Puzzled at this question, the parson replied that he did not eat hay. "Then ye're not fit companion for me, nor beast," the native declared, and rode away.—Exchange.

HERE'S A TWO-YEAR CLOCK

One of the limitations of the ordinary desk clock is that, frequently through oversight, it is not wound up, and consequently stops. This generally causes annoyance and perhaps, the loss of a business engagement. A new electric clock has been designed to overcome this. It is arranged to run for two years on a small battery of dry cells. The clock is of the average desk type and has two wires leading to the batteries. These occupy small space and may be placed in the bottom drawer of the desk. The clock, it is claimed, will require no attention until the batteries give out.

The Elks circus opened its doors Wednesday night regardless of the weather. The show is a big one, the industrial features being especially attractive.

Life History of Clara Barton by Chas. Young

Charles Sumner Young, A. M., Ph. D., proprietor and editor of newspapers, state superintendent of public instruction, president department of superintendence, N. E. A., first vice-president international congress of educators, attorney and land agent for Nevada, at Washington, D. C., and for many years a citizen of California, writes from Boston that his book, "Clara Barton: A Centenary Tribute to the World's Greatest Humanitarian," is now off the press and ready for distribution.

Mr. Young is Clara Barton's personally authorized biographer. He has devoted a number of years in collecting data and writing the life history of this grand woman, founder of the Red Cross, of whom the present generation know so little. The life of Clara Barton is being taught in many of the public schools of the New England states, where Clara Barton was born and spent her childhood days. In reverence to this historic character, her life should be familiarized to every child.

Charles Sumner Young is a close personal friend of Congressman Charles F. Curry, and is a frequent guest at the latter's home in Washington. Congressman Curry says Mr. Young's book on the life of Clara Barton has made a great hit at the psychological time, when patriotism and loyalty has a tendency to slacken in the younger generation.

The book consists of 446 pages with 140 illustrations. The book is arranged by topics, with classified quotations respectively pertaining to the text, for use in the public schools and colleges.

The Gorman Press, Boston. Ornamental commercial leather and gold, large 8vo., illustrated, \$7.50.

REMEMBER THOU ART A MAN

Ancient Romans Never Forget to Ask "Why Should the Spirit of Mortal Be Proud?"

It was customary in ancient Rome, whenever a successful general was awarded the honor of a public triumph, to place in the chariot with him a public slave who, according to Tertullian, ever and anon whispered into the ear of the conqueror the words, "Homineum memento to" (Remember thou art a man!).

Vespasian, the Roman emperor, had a slave who said to him daily, as he left his apartment, "Remember thou art only a man," and thus reminded him of the transitory nature of earthly glory.

A BOTTLE TOM'S NEST

A pair of long-tailed tits has made a remarkable departure from their nesting traditions in a Sussex orchard. Usually the marvelous, lichen-covered, feather-lined poke of a nest—with a mattress of over 5,000 feathers—is set in the heart of a thorn bush, where the silvery walls rather display than conceal. These wise little tits have built in the fork of an old, lichen-covered apple tree, and their nest looks exactly like part of the tree. Only by seeing the entrance hole by chance, or the birds coming and going, could the sharpest eyes discover their secret.—London Morning Post.

Mrs. H. A. Stiver is visiting in Los Angeles.

The automobiles will be given away next Tuesday night at 10 o'clock.

Industrial Show Best Ever Staged in City

S. F. Voters Would 'Modify Volstead' Act

San Francisco, Nov. 8.—San Francisco voters, by a vote of two to one, directed the city board of supervisors to memorialize congress asking modification of the Volstead act to permit light wines and beer, returns today showed.

If we could see what is wrong with ourselves as easily as we see what is wrong with the government, we wouldn't have to wait for a new congress to bring "good times."

ANTS USE THE LIVING CHAIN

When the Nest of Leaves Is Damaged Intelligent Insects Adopt Fire-men's Methods.

There are certain ants found in various parts of the world, particularly Asia, Africa and Australia, that build their nests by binding the leaves together with the aid of silk threads that the larvae spin. If the nest is torn in any way, so that the leaves are separated from one another, the ants immediately hurry out.

Whole some defend the nest often hasten to repair the damage done. From one edge of the break the workers try to reach with their mandibles the edge of the neighboring leaf, in order to draw the two edges together, but if the distance is too great they form a living chain.

The ants then clean up and polish the edges of the leaves. When the edges of the leaves are perfectly clean, several workers emerge from the nest, each holding the larvae by the body with head upward. The full-grown ant exerts a mild pressure with its mandibles until it causes the larvae to excrete from its mouth a liquid that, in solidifying, forms a silk thread. By carrying the head of the larvae from the edge of one leaf to the edge of the other, the ant obtains a web that holds the two leaves together. The interior walls of the nest are formed in the same way.

CHICKWEED ON TREES

One of the first flowers to greet us in the spring, and one that blooms along into early summer, is the dainty giant or great chickweed. One cannot pass this species of chickweed without noticing its pretty white flowers. Sometimes the seeds of this plant find their way into some crotch of a tree. Then we have the pleasure of seeing a fine specimen flourishing quite a distance up from terra firma and often doing better than those on the ground.

AN ARTFUL DODGER

"I believe I'll write another column on 'Whither Are We Drifting?' remarked the editor of the Chiggersville Clarion.
"Are you hard up for something to write about?"
"Exactly. As nobody seems to know whether we are drifting, I can grind out a column and leave the question with my readers."—Birmingham Age-Herald.

SUGGESTED A PELICAN

Briggs—That famous soprano you had at your dinner party last night sang like a bird.
Origgs—Like a bird is right. I was conscious of her bill the entire evening.—Boston Transcript.

THE TERMINAL, Richmond's industrial newspaper.

Elks Circus—Nov. 6—14. Don't miss it. Season ticket \$6c.

Richmond Elks Start the Big Charity Circus

The Elks' Charity Circus opened with a bang Wednesday night, two days later than scheduled, on account of Old Juke, who has been cutting up the entire week. Whether he had it in for 1251, or just had to "spill it" circus week, is a guess; but the Elks are going to keep right on circusing until the weather man puts on some sunshine and a clear sky. The show will continue until next Tuesday night, when the two fine automobiles will be drawn by some lucky "guy or guys."

The industrial features of the show are excellent, especially the automobile display. All the booths are a credit to the management; and the show taken as a whole is the best ever put on in Richmond. The vaudeville was high class, the talent all professional, selected from the big circuits.

Bridge Hearing Is Laid Over to Dec. 11

Martinez, Cal., Nov. 10.—The hearing of the different propositions of bridge companies to span Carquinez straits, which has been up before the board of supervisors, was postponed until Dec. 12. A number of objections were filed against building bridges across the straits, the Hawaiian Sugar people claiming that the bridges would be a menace to navigation.

Red Cross Roll Call

Chairman Hutt Brown announces that arrangements are being made for the roll call of Richmond Red Cross. The annual drive will begin next Monday.

Fox Elected Constable in Crockett

Crockett, Nov. 8.—James Fox, running as a write-in candidate against Robert Johnson for constable at Crockett won by 19 votes, it was reported. The vote was 600 for Johnson and 619 for Fox. Fox was defeated at the primaries by 47 votes.

Albany Election

Albany, Cal., Nov. 9.—Richardson for governor carried Albany by a 2 to 1 vote, as did Johnson for U. S. senator.

For congressman, 6th district, Lafferty is elected by large majority. For state senator, Edgar S. Hurley defeated Frank V. Cornish by a substantial majority.

Chris. B. Fox, for assemblyman, had it all his own way, and received almost a unanimous vote. Out of 1500 registered voters, 1400 were cast.

Mt. Diablo Park Will Materialize

The Mt. Diablo state park council is making progress in perfecting plans to establish a state park on Mt. Diablo. The council is promised the co-operation of the Contra Costa county board of supervisors. A celebration on Mt. Diablo has been suggested by Wells Drury, member of the state council.

No one ever does anything very important with gloves on.

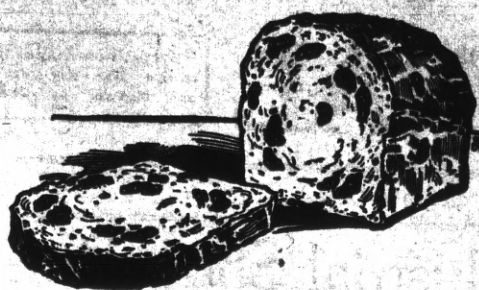

OAKLAND | Fourteenth and Clay Streets | OAKLAND

Capwells

Jacquette Coats

\$29.50 to \$45.00

Milady of Fashion is now smartly and ingeniously garbed for street and afternoon affairs in a snappy, short, jacquette style coat. We are showing these chic creations in pile fabrics in a variety of the most desirable fashions. Jaunty misses' models in imitation Krimmer in both jacquette or slightly longer styles, very reasonably priced.

Bakers Bake It For You

—no need to bake at home

HERE'S your old-time favorite—full-fruited raisin bread with at least eight tempting raisins to the slice—already baked for you by master bakers in your city.

Simply 'phone your grocer or a neighborhood bake shop and have a fresh loaf for lunch or dinner to delight your folks.

We've arranged with bakers in almost every town and city to bake this full-fruited raisin bread.

Made with big, plump, tender seeded raisins. The raisin flavor permeates the bread. You've never tasted finer food. Order a loaf now and count the raisins.

Raisin bread is a rare combination of nutritious cereal and fruit—both good and good for you. Serve at least twice weekly to get the benefits.

Use Sun-Maid for home cooking of puddings, cakes, cookies, etc.

You may be offered other brands that you know less well than Sun-Maid, but the kind you want is the kind you know is good. Insist, therefore, on Sun-Maid brand. They cost no more than ordinary raisins.

Mail coupon for free book of tested "Sun-Maid Recipes."

SUN-MAID RAISINS

The Supreme Bread Raisin

Your retailer should sell you Sun-Maid Raisins for not more than the following prices:

Seeded (in 15 oz. blue pkg.)—20¢
Seedless (in 15 oz. red pkg.)—18¢
Seeded and Seedless (11 oz.)—18¢

CUT THIS OUT AND SEND IT

Sun-Maid Raisin Growers, Dept. N-563-4, Fresno, California
Please send me copy of your free book, "Recipes with Raisins."

Putnam Fadeless Dyes—dyes or tints as you wish

A Foreign City. A friend, who spent several months in the East, says the thing that impressed him most about New York is that it is a foreign city.

The municipal signs are printed in English, Italian and Yiddish. You hear more foreign language than English in the subway, and everywhere foreign language newspapers are seen. In large sections of the city you do not see an American, or hear English spoken.

A Lady of Distinction. Is recognized by the delicate fascinating influence of the perfume she uses. A bath with Cuticura Soap and hot water to thoroughly cleanse the pores followed by a dusting with Cuticura Talcum powder usually means a clear, sweet, healthy skin.—Advertisement.

Natural Indignation. Grubshaw—So there's no truth in the report that you've been dodging your income tax?
Newrich—It's an infamous libel. I've tried to do it every possible way, but have never succeeded.—New York Sun.

The Observant Newsdealer. Of course the woman knows her newsdealer well. He is very friendly. The other day she stopped in for some additional magazines and papers to take with her for a day's outing she was to have. She thought she was looking quite well—that is, she fancied she had managed to make herself look smart without putting on her best clothes.

The newsdealer seemed quite delighted to think she was going to have a day in which to rest and idle. "It's fine," he said. "And you can have a real good time with your old clothes and all."

Important to Mothers. Examine carefully every bottle of CASTORIA, that famous old remedy for infants and children, and see that it bears the Signature of Dr. J. C. F. W. In Use for Over 30 Years.

Children Cry for Fletcher's Castoria
Wasted. "Naw, I don't like euchre." "Why not?" "Can't bear to see good poker hands going to waste."

CALUMET

The Economy BAKING POWDER

Never accept "Just as Good" Brands; it will only mean disappointments and failures on bake-day, which are expensive.

Calumet is a High Grade Baking Powder, Moderate in Price

When you use it you never spoil any of the expensive ingredients used—such as flour, sugar, eggs and milk.

The sale of Calumet is 2½ times as much as that of any other brand.

WORLD'S GREATEST BAKING POWDER

GOOD ROADS

INCREASE IN MOTOR TRUCKS

Business of Nation Turning More and More to Highway Transportation, Say Statistics.

Prepared by the United States Department of Agriculture.
That the business of the nation is turning more and more to highway transportation is indicated by statistics on motor-vehicle registration as of July 1, compiled by the bureau of public roads of the United States Department of Agriculture. Registration of passenger cars, taxis, busses, and motor trucks totaled 10,020,471 on this date, an increase of 157,176, which is a healthy growth, as the first half of the year is the off season for registration of new vehicles.

The surprising fact, however, is that of the 157,174 increase in registration; motor trucks constituted 116,701, against 35,090 passenger cars and 5,443 taxis and busses. This means an increase of over 16 per cent of the number of motor trucks at the beginning of the year. Figures are not available to show what part of the increase of 5,443, or nearly 11 per cent, in the taxi and bus registration is due to the increase in the number of busses traveling rural and suburban routes, but it is very probable that a considerable part of the increase is due to the development of this new form of transportation.

It has been frequently said that the traffic is always ready and waiting when good roads are built, and that the commercial vehicle as a class is more handicapped by lack of good roads than the pleasure vehicle. The increase in the registration of commercial

Motor Truck is More Handicapped by Lack of Good Roads Than Pleasure Vehicle.

vehicles, coupled with the present activity in highway construction, seems to bear out this statement in the opinion of department officials. The table of statistics issued by the bureau shows a registration of 9,007,874 private cars, 85,990 taxis and busses, and 1,006,606 motor trucks, making a total of 10,020,471. Motor cycles are not included, there being 140,924 against 198,281 at the beginning of the year.

LINE HIGHWAYS WITH TREES

Forestry Department of Minnesota Plans to Set Out 30,000 Plants Along Roads.

To make Minnesota famous as "the state with the tree-lined highways" is the object which the forestry department of that state has set out to accomplish. The department will plant 30,000 trees along the highways this year and each year hereafter will add to the number. What Minnesota is doing is also being done in Pennsylvania and other states. Experts say if the trees are set back far enough their roots will not injure road pavements. It was contended at one time that tree roots and the shade cast by the branches were detrimental to asphalt paving, but experience in Washington, D. C., and other cities, especially in Florida, Illinois, Massachusetts and California, has proved the falsity of that idea.

FINEST STRETCH OF HIGHWAY

New Six-Mile Road Between Elizabeth and Rahway in New Jersey is Given Praise.

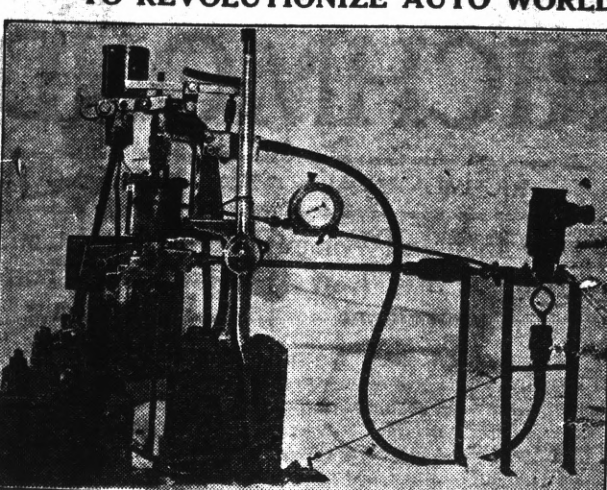

The finest existing stretch of the Lincoln Highway between New York city and San Francisco is said to be a new six-mile road between Elizabeth and Rahway, in New Jersey. It will be surpassed only by the Ideal Section, which the Lincoln Highway association is to build with the co-operation of the federal government and the state of Indiana, south of Chicago, this year.

Meaning of Bad Roads. Roads are the veins and arteries of community life. Bad roads mean stagnation, heart failure and social death.

Air Spoils Sludge. Air pockets in the sludge cause spoilage. Good packing is essential to good sludge.

Waste Some Sludge. It is better to waste a little of the good sludge than to feed some of the doubtful material.

NEW INVENTION FROM ENGLAND TO REVOLUTIONIZE AUTO WORLD

The photograph is of an improved motor, on which English engineers have been working for the past five years. The motor is said to be able to make one gallon of gas do what would ordinarily require two gallons, will run any combustion engine on paraffin, gasoline, crude oil or tar with equal results. The main idea, to prevent waste, and to automatically allow the exact charge of gas properly mixed with air to enter the cylinder, was conceived by a Mr. Norman of Swansea, England. The present theory is that fuel is not yet vaporized, and it is claimed this device will do so.

DON'T FUSS TOO MUCH WITH AUTO

Fault is Equally as Expensive as Neglecting to Give Car Necessary Attention.

CURIOSITY IS RESPONSIBLE

Much Work of Repair Shops is Merely Undoing Mechanical Crimes of Owners—One Driver Ignored Oil Indicator.

A fault equally as destructive to the car as neglecting it is the habit of fussing too much with it. The time-worn "happy medium" applies as elsewhere, but its exact nature requires a bit of explanation.

Not to all the bearing of the generator means subjecting it to excessive friction, with resulting excessive wear and screaming; to put too many drops of oil through the oil lead means short circuiting the armature—and trouble. If the fan belt is not tightened occasionally it will slip and cause the engine to overheat; if it is tightened too often it will stretch and break prematurely, leaving the driver in nine cases out of ten stranded on the road.

Misdirected Attention.

The car that is lavished with misdirected attention is quite likely to be in worse condition than the car which is abused. It's the old story of the meddling youngster grown up to be an inquisitive car owner. Much of the work that comes to repair shops is merely undoing the mechanical crimes committed by the over curious car owners.

Ignored Oil Indicator.

One driver so keen about lubricating the engine that he chose to ignore the oil indicator and kept adding a quart of lubricant every time he saw a chance to let the garage man see how well he took care of his car. One day they towed him home and drained fifteen quarts of oil from the crank case before the gasping pistons were free to travel up and down in their cylinders.

COMPRESSION MUST BE GOOD

Leads Not Only Lessens Engine Power, but Also Causes Inefficient Operation.

Compression must be good to derive maximum power from an engine. Leaks will cut down the engine's operation by weakening the fuel charges entering the cylinders, thereby lessening the energy exerted upon pistons during power strokes, and they will cause loss of pressure during this stroke. If the compression leak is in an inlet valve the fuel charges will be driven back into the inlet manifold, possibly igniting and spitting back through the carburetor. If leak is in exhaust valve, the fuel will pass into exhaust pipes, where it will ignite and backfire. If the rings leak, condensed gasoline from the mixture admitted to explosion chambers will run down into the crankcase, diluting the cylinder oil and ruining its lubricating qualities. Thus compression leaks will not only lessen power, but will also cause inefficient operation and increased wear to bearing surfaces.

REMOVE MUD FROM RADIATOR

Best Plan to Use Water Directed From Hose to Clean Passages—Cable Easily Injured.

Mud and dirt that have become hardened in the coils of the radiator should never be removed with wire or a tool. The thin coil walls are easily punctured and small leaks in the radiator invariably result. Use water directed from a hose to clear the passages, with the stream guided from the engine side.

You Auto Know

That after the oil is drained from the crank-case, an operation which should be attended to every thousand miles or so, about half a gallon of kerosene should be poured in and the engine run for a minute or less, so that the kerosene may be thoroughly circulated through the lubricating system. This will completely remove the old and worn-out or thinned oil and make it easy for the new supply to function properly.

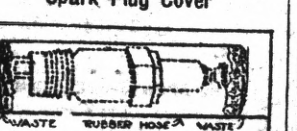

After the engine has been run, the kerosene should be drained off, the screen which guards the oil pump removed, washed in kerosene and replaced and the splash pans under the connecting rods wiped off. Finally, after the entire interior of the engine has received its internal bath, the crank-case should be filled with fresh oil of the proper grade. If this is done at proper intervals, there will be few if any lubricating troubles and, while it is a messy job, the operation is well worth while, because even slight damage to the mechanism is likely to cost a good deal more than fresh oil and the expense of putting it in. (© by the Wheeler Syndicate, Inc.)

CARE FOR UNIVERSAL JOINT

It Does Great Amount of Work and Must Be Lubricated Properly to Stand Strain.

The universal joint should never be neglected because it is not easy of access. It does a terrific amount of work, and must be lubricated properly to stand the strain and also to transmit power without absorbing a great deal of it through friction. As it begins to wear it develops a peculiar thump, which gets worse very rapidly.

Spark Plug Cover

Extra spark plugs may be protected from breakage by inserting them in a section of rubber hose. Each end should be closed with a bit of waste to prevent the plug from working out.

AUTOMOBILE NEWS

Tires wear down fast if wheels are misaligned.

Never change a single ball in a bearing. Renew them all.

Correct wheel alignment saves tire wear and should not be neglected.

If the storage battery is overcharged keep the headlights burning by day.

To polish headlight reflectors, rub lightly with a soft wet cloth and a chamola.

Brakes should be so adjusted that the car can be brought to a stop without grabbing.

Inspect wheels carefully and note any damage. Do they run true? Are the flange bolts tight?

The seat of honor of an automobile is the one next to the operator, if the car is driven by the owner.

When you have a puncture at night and the flashlight plays out, take the battery apart and place the bottom cell on top. Then you will have light enough to finish the work and go on your way.

SWAMP-ROOT FOR KIDNEY AILMENTS

There is only one medicine that really stands out prominently as a medicine for curable ailments of the kidneys, liver and bladder.

Dr. Kilmer's Swamp-Root stands the highest for the reason that it has proven to be just the remedy needed in thousands upon thousands of distressing cases. Swamp-Root makes friends quickly because its mild and immediate effect is soon realized in most cases. It is a gentle, healing vegetable compound.

Start treatment at once. Sold at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing, please mention this paper.—Advertisement.

Monkey Reasons.

It used to be thought that beasts and birds were guided in their action entirely by instinct, reason playing no part whatever in their daily lives. But now naturalists are not so sure. To learn to use a lever as a mechanical instrument implies, one would think, a certain amount of reasoning power. Yet a monkey kept in captivity supplied a stick to pry up the lid of a chest which was otherwise too heavy for the animal to raise.

Superfluity.

"Pa, what is a non-essential industry?" "Well, for example, my son, making artificial flies."

Best men are often molded out of faults.

The man who wants nothing gets it.

Miss E. L. Carrell

Peshastin, Washington.—"When I was about fourteen years of age I had an operation for appendicitis and the doctor said it would retard development until I was 18 or 19 years of age, but I heard how good Dr. Pierce's Favorite Prescription was for young girls so I took four bottles of it and came into womanhood within a year. Then I started getting healthy and strong. Before I took Dr. Pierce's medicine I weighed only 72 pounds—now I weigh 107. Later in life I took a breaking-out on my face. I wrote to Dr. Pierce and he advised me to take the 'Golden Medical Discovery.' I took two bottles of it and my skin is as smooth as I could wish for."—Miss E. L. Carrell, Box 24.

Write Dr. Pierce's Invalid's Hotel in Buffalo, N. Y., for free medical advice or send 10c for trial package of any of his medicines.

Following Through.

"Bah! Golf is an old man's game!" "I can't afford it, either."—Nashville Tennessean.

Don't imagine that you are the center of gravity.

SAY "BAYER" when you buy. Insist!

Unless you see the "Bayer Cross" on tablets, you are not getting the genuine Bayer product prescribed by physicians over 23 years and proved safe by millions for

Beautiful Eyes like this are the eyes of a woman who has used Murine. The only eye medicine that cures all eye troubles. Murine is the only eye medicine that cures all eye troubles. Murine is the only eye medicine that cures all eye troubles.

BOY SCOUTS

(Conducted by National Council of the Boy Scouts of America.)

EXECUTIVES' CONFERENCE

The second biennial conference of scout executives held at Blue Ridge, N. C., in September, proved to be the largest meeting of professional leaders of boys ever held in the world. Over 400 executives from all parts of the country, devoting their full time to the work of scouting and a group of experts in executive management, leadership, education, recreation, out-of-doors activities, camp and woodcraft, Indian lore and boy psychology, met for the purpose of training and discussion. These executives are regarded as the key-men, so to speak, of this great movement numbering 550,000 boys and men. On them rests the responsibility of maintaining standards and keeping the work efficient and progressive, and of bringing within the reach of every boy in this country, regardless of birth, creed or nationality the advantages of the scout movement—namely, character building and citizenship training through a program of work and play in the out-of-doors.

The earliest morning, hour each day of the conference was devoted to a training course for new executives. This was under the leadership of Lorne W. Barclay, national director of education, B. S. of A. Among the speakers were James E. West, chief scout executive; A. A. Shuck, executive of Reading, Pa.; George E. Ehler, national director of records; E. B. De Groot, executive of Los Angeles; James M. Brockway, executive of Portland, Ore.; and Dr. George J. Fisher, deputy chief scout executive, and E. St. Elmo Lewis of New York, Detroit and Chicago, who delivered a powerful series of addresses on citizenship, finances and budgets, fundraising and publicity, records and accounting, the executive and the community.

Then came a good morning sing, followed by inspirational talks on "Service," given by Franklin K. Mathews, chief scout librarian; Prof. H. H. Horne, professor of history of education and philosophy at New York university; Rev. John F. White, educational director of boy scout extension, national Catholic Welfare council, and others.
Each afternoon the conference hiked in true scout fashion to the woods of the Blue Ridge hills, to learn from some of this country's greatest recreation experts the activities in the open that boys love. The most built lean-to of branches, improvised beds of balsam boughs, learned to tie a diamond hitch, light camp fires without matches—even when dampness prevails—that would fill an uninitiated with total dismay; they learned how to blaze new trails, and more than one method of finding their way when lost in the woods.

National Scout Commissioner Dan Beard, actual pioneer of many years' experience, daily gave demonstration of campcraft and woodcraft. Commodore W. E. Longfellow, noted swimmer and official of the American Red Cross, gave instruction in lifesaving by land and by water.

New games—red-blooded by games that call for sportsmanlike attitude, that develop strength and clear thinking and are filled with the joy of adventure, were demonstrated by Charles F. Smith, in charge of the Scoutmasters' Training school at Columbia university, and by Dr. E. K. Fretwell, also of Columbia, both of whom are authorities in the subject of recreation. Ralph Hubbard, expert plainsman, student for many years in Indian ceremonialism, interpreted Indian lore and exhibited his collection of Indian regalia. Mr. James A. Wilder, author, boy expert and chief sea scout, Boy Scouts of America, came to the conference from Hawaii. L. L. McDonald, national director of camping, shared with his colleagues the knowledge and experience he had gained from study and inspection of scout camps throughout the country; safety measures, programs for camps, camp sanitation and real cooking were features Mr. McDonald emphasizes. Prof. J. C. Elison, director of scout courses of the University of Wisconsin, and Prof. E. Laurence Palmer, assistant professor of rural education of Cornell university, contributed special ideas on out-of-door work and play. Also one of the national council officers, George D. Pratt, treasurer, who for many years has been a member of the Camp Fire Club of America, took part in the out-of-door instruction.

THE PIONEER SCOUT

A pioneer scout is a scout who, because of distance or other reasons, cannot associate himself with a troop, and hence carries on his scouting alone, after the manner of the great early pioneers.

SCOUTS TO LAY TRAIL

Boy scouts of the Bronx, New York, are laying a trail which will completely encircle the Ramapo lake camp, and will measure to level miles, which will be entered from 25 to 50 percent when all the hills and valleys are included. Portions of this trail have already been marked, but many of the markers have disappeared. The trail follows a path of remarkable scenic beauty and the scouts work as trail layers will be a real good turn to all who enjoy hiking.

Warning Odor to Detect Gas Leak

Yale Scientists Experiment to Find Mixture That Will Give Notice of Escaping Fumes.

SEEK ANTIDOTE FOR ASPHYXIA

Artificial Atmosphere 95 Per Cent Oxygen Called Best Method Yet Known—Doctors Breathe Gas to Test Cure.

New York.—Scientists of Yale university, who have been asked by the American Gas association to discover some means of reducing accidental deaths by asphyxiation, have developed a new technique for rescuing persons overcome by gas and are also experimenting with warning odors to mix with gas in order to make escaping fumes detected far more quickly than at present.

The most efficient warning odor so far developed is a substance called mercaptan. Dr. Yandell Henderson of Yale who, with Prof. Howard W. Haggard, has been in charge of these investigations, said that mercaptan had an odor closely resembling that of the skunk, and that objections had been made against its use, in spite of its admitted high efficiency. One drop of the substance, which can be made synthetically from coal tar, is said to be sufficient to diffuse a powerful warning odor throughout the Grand Central terminal. Because of the enormous volume of gas used in this city any substance suited for the purpose of giving far and wide the alarm of leaking gas must be capable of communicating a sharp odor to an enormous volume of air or gas. When he was reminded that a slight odor of gas often hung about a gas jet or stove, Doctor Henderson said:

"In good modern apparatus, there should be no trouble of that kind. If any substance is to be mixed with the gas to give it an odor, it must be something strong enough to be noticed at once."

Call Most Gas Deaths Suicide.
So far no gas company has carried the experiment to the extent of furnishing mercaptan mixed with gas to their customers. In spite of the admitted excellence of such a signal as a life-saver, the scientists held that the best practical method for cutting down accidental deaths in cities through the use of gas was the requirement of a high standard of gas apparatus. The report of Doctor Henderson and Haggard to the American Gas association said:

"The observations made by the authors during the investigation indicate that a considerable number of the cases of fatal asphyxiation recorded as accidental in the Borough of Manhattan, New York city, are really suicide. The published figures for 1920 report 124 suicides by gas out of a total of 300 suicides; they report also 189 fatal accidental gasings out of a total of 2,215 violent deaths, this total includ-

ing 461 highway fatalities and 307 falls from windows, elevators, etc. In the 313 deaths thus assigned to gas, suicides certainly contributed in reality a much larger proportion and the accidental gasings were correspondingly fewer than these figures show. The average citizen of New York runs a much greater risk of losing his life in a street accident or by a fall from a window or elevator than from asphyxiation and he may reduce the latter risk practically to zero by the exercise of a little care.

Blames Defective Apparatus.
"In fact, a large proportion of accidental fatalities are due to obviously defective fixtures, chiefly cheap, badly made, old, worn, cracked, loose tubing between the gas jet and stove or burners of various sorts. This is not a matter over which gas companies can exercise any control."

The experiments of the Yale scientists were reported as establishing the value of the administration to asphyxiated persons of an artificial atmosphere composed of 5 per cent carbon dioxide and 95 per cent oxygen. The carbon dioxide in the human system, it is alleged, automatically regulates the action of the lungs. Carried by the blood to brain centers, controlling the breathing apparatus, the carbon dioxide stimulates breathing. Gas poisoning upsets this automatic control, because the carbon dioxide which is breathed by the victim has a chemical effect, destroying

Seek in London 'Crime Napoleon'

Scotland Yard Believes Superman of Underworld Is Directing Robberies.

GEM THEFTS ON INCREASE

Recent Big Robberies So Well Planned and Executed That Police Can Do Little More Than Suspect Authors.

London.—Police are seeking in this city the head of what is said to be a remarkable group of international criminals. A veritable "Napoleon of crime" is believed to have established his headquarters here. He is alleged to command a well-organized band of international crooks, every one of whom is a past master of every form of nefarious craftsmanship known in the underworld. They include men of education, scientific attainments and social charm. Under leadership of their mysterious chief they are credited with conducting burglaries, crack-

Former Newsboy Becomes President of University

Los Angeles, Cal.—From newsboy to university president at the age of thirty-three is the record of Cloyd Heck Marvin, M. A., Ph. D. for more than three years dean and assistant director of the University of California's southern branch, who was given a farewell luncheon by the Los Angeles chamber of commerce, prior to his departure for Tucson, to become president of the University of Arizona.

much of the carbon dioxide normally in the bloodstream. The sufferer, therefore, quite breathing and, as his system is deprived of oxygen, he becomes asphyxiated.

Doctors Henderson and Haggard and others voluntarily allowed themselves to be rendered unconscious by gas in order to prove the value of their carbon dioxide and oxygen mixture. Breathing these substances from tanks, in which they were compressed, they were speedily restored, without the ordinary after-effects of asphyxiation, according to their reports.

After discussing the other methods and explaining the carbon-dioxide and oxygen treatment, the report continues:

"The point cannot be too strongly emphasized that for treatment to be effective it must be applied at the earliest possible moment after the victim is discovered and must remove the carbon monoxide from his blood as soon as possible."

ing safes and committing costly jewel robberies that baffle detection. They are declared to work in accordance with plans of campaign prepared by the master mind with all the skill of a great military strategist.

Gem Robberies Increase

Several papers print this story with varying degrees of sensationalism. Of late there has been an increasing number of jewel robberies. As a result an insurance company which insures a good deal of valuable jewelry has increased its premiums charged on this class of risks by 25 per cent.

J. W. Bell, one of London's leading assessors, says that many recent big robberies have been so well planned and executed that the police can do little more than suspect the authors.

"The people who engineer these crimes are not the ordinary type of thief," Mr. Bell says. "There is more than one real Raffles in existence today. They hunt society gatherings, and in the hotels they are popular guests."

"I know one man who has a town address, a country house near Bourne-mouth, and two fine motor cars, who is more than suspected of complicity in some of these great robberies, but up to the present there has never been the slightest chance of connecting him with any of them."

Thief Worth \$150,000.
"He is of good appearance, always well dressed and world, in the ordinary way, he is accepted as a guest at the houses of wealthy people."

"I know one instance in which a director of thieves is reputed to be worth \$150,000. Another successful director is a woman who has a university education and a cultured and charming personality."

"The victims, both in hotels and at private houses, often are watched and shadowed for days before a suitable opportunity for the robbery occurs. It may easily cost \$1,000 or \$1,500 to meet the expenses of a successful haul, and the big thieves require frequent robberies to maintain themselves."

Russ Print 5,000,000,000 Rubles.
Stockholm.—A Swedish bank note company has received an order from the soviet government to print notes aggregating a face value of 5,000,000,000 rubles (nominal value \$2,500,000,000), according to a Riga correspondent.

A further subsidy of 600,000,000 lire is being allotted.

COOLNESS SAVES MAN'S LIFE

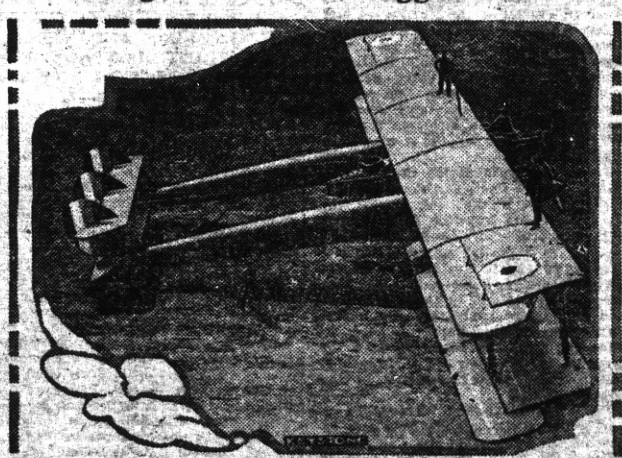

Catches Hold of Feed Wire Carrying 22,000 Volts, Keeps His Head and Breaks Circuit.

New York.—George B. Wagner, 44, electrician of Rochester, Mass., caught hold of a feed wire carrying 22,000 volts while working on defective wiring in the power house of the New York Central railroad at Locust avenue and One Hundred and Forty-third street.

The wire was loose and came to Wagner's chest, but instead of trying to pull himself away he dropped slowly to his knees, pulling the wire down with him until he was able to touch the concrete floor with his elbow. This broke the circuit and Wagner was thrown loose from the wire.

He was sent to Lincoln hospital, where he was treated for burns about the hands, face and neck. He was able to work again a few days later.

Bombing Plane Owl, Biggest in U. S.

This is the "Owl" the largest airplane in America, which has been taking part in the army's aerial maneuvers at Mitchell Field, Mineola, L. I.

SCARCITY OF HOUSES HITS ROME

Shortage of Dwellings in Eternal City Serious Problem.

One Hundred Thousands More Rooms Are Needed to House Population—People Live in Immoral Conditions Because of Shortage.

Rome.—The "house hunger," as the lack of dwellings is called in Italian, is increasing in Rome. According to a statement by Doctor Raimondi, municipal councillor, Rome, a city of 600,000 inhabitants, needs 100,000 more rooms to house its population.

The surplus of people is now living in unhealthy and immoral conditions, Doctor Raimondi says. "There are some quarters of the city where each room is occupied by from six to eight persons in the greatest promiscuity, and at Porta Metropoli, one of the poorest districts of Rome 28 persons are living in three rooms."

Also at the very gates of Rome a portion of the population has reverted to the troglodytic period and lives in grottoes excavated in the hills, while others have built straw huts to house their families.

This state of affairs is a consequence of the war. On account of the rise in the price of building materials, the construction of houses ceased practically entirely for about eight years. The government has tried to meet the situation by appropriating 800,000,000 lire (at par \$100,000,000) to be lent at 3 per cent to workmen, civil servants, etc., for the purpose of home-building.

Such amount, however, is not enough, according to Doctor Raimondi, for it provides only for the construction of about 30,000 rooms. This, together with 10,000 rooms which are being built by private individuals without state subsidy, makes a total of 40,000 rooms, leaving 80,000 more to be built within the next three years.

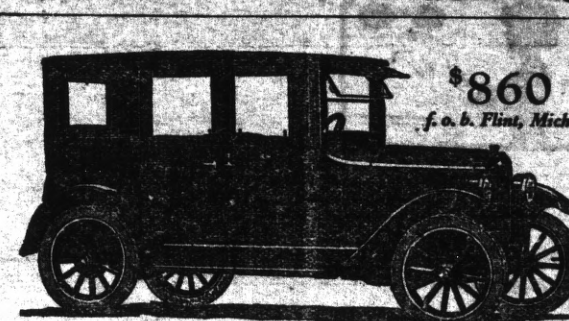

WRIGLEY'S

AFTER EVERY MEAL

It's BENEFICIAL! Aids appetite and digestion, helps to keep teeth clean and breath sweet.

It's LONG-LASTING! Full of flavor that won't chew out.

It's ECONOMICAL! A five cent package provides a treat for the whole family.

1923 SUPERIOR Chevrolet Sedan

In 1922 Chevrolet led the world in sales of quality closed cars chiefly because of the Sedan. This new Fisher Body Sedan is completely eclipsing its predecessor because:

QUALITY has been still further improved by more artistic design and added improvements.

ECONOMY has been still further increased by engineering refinements and greatly broadened production and distribution facilities.

SERVICE is now offered on a flat rate basis by 10,000 dealers and service stations.

PRICE remains the same, in spite of added equipment and more expensive construction, which have greatly increased value.

Some distinctive features of the new line are: streamlining body design with high hood and crowned, paneled fenders; vacuum feed and rear gasoline tank on all models; drum type head lamps with legal lenses. Curtains open with doors of open models.

Closed models have Fisher Bodies with plate glass Temstedt regulated windows, straight side cord tires, sun visor, windshield wiper and dash light. The Sedanette is equipped with auto trunk on rear.

See these remarkable cars. Study the specifications.

DREW THE LINE AT FORGERY

Youngster's Explanation of Reason for the Wrong Initials Was at Least Ingenious.

William, the sixth grade son of Mr. and Mrs. James R. Smith passed up school one alluring winter afternoon and in order to avoid any unpleasantness that might naturally arise from the situation wrote out his own note to his teacher the following day:

"Please excuse William because of illness."

(Signed) "MRS. J. P. SMITH."

The note was correctly written and extremely well done and "got by" splendidly until the teacher happened to meet Mrs. Smith several days later. During the conversation, son William's "game" was uncovered and that night he was third-degreed by the family.

"But, why in the world, William, did you sign the note 'Mrs. J. P. Smith'? Don't you know our initials are J. R. Smith?" asked the father.

"Sure, I know that, father, but do you think I wanted to be caught for forgery?"—Indianapolis News.

MOUNTAIN'S TOP FALLS

A terrace of porphyrous rock in the Pyrenees on the top of the Pic du Midi, 8,500 feet, surmounted by an observatory, is collapsing owing to the formation of caverns underneath, where during the winter snow has melted. A large section of the observatory building has crashed into the caverns and it is feared that the rest of the observatory is untenable. The astronomers have applied to Turin for engineers, who will visit the Pic du Midi and decide if the building can be consolidated or if it must be abandoned.

HE WAS IN THE SAME BOAT

Second Man Perfectly Understood the Reason for His Companion's Bitter Outbreak.

"The late Henry Watterson," said an editor, "was a partisan, but a fair partisan. He once told me a good story on this head."

"He said that two men sat side by side in the smoker of a train which was traveling away from Washington. The men were strangers to each other, but suddenly one of them broke out:

"This here administration is the worst the country has ever saw. Liars, thieves, murderers! I tell you, mister, if you was to take the heads of this administration and put them to cleaning out our sewers, and if at the same time you took the same number of sewer cleaners and put them to running the government, why, the country would be a darn sight better off, only we'd all be killed off with typhoid fever and smallpox because the sewers wasn't cleaned out proper."

"At the end of this strange harangue the second man smiled and nodded."

"Friend," he said, "I wasn't able to land a postmaster'ship, either."

THE MUSIC LOVERS

"Why do you go to the concerts if you don't know anything about music?"

"I like to watch the faces of the people who don't know anything either."—Fliegende Blätter.

Discriminating Taxes—Who Pays?

A leading bond house advertises \$75,000,000 of 20-year Federal Land Bank 4% bonds for sale, stating that the bonds are free from taxation. This amount removed from the country's tax rolls, must be made up by excess taxes on employing industries which now bear the great burden of taxation to raise money for development purposes. Vast fortunes are now securing the protection of a good government by escaping the obligation of maintaining such a government by investing in tax-exempt securities, for which the vast majority must sweat to protect if the government is to be maintained.

Fire Prevention Week

Why have a "fire prevention week?" Why not make every week a fire prevention week and not forget it? When property valued at nearly two billion dollars is destroyed in five years and 75,000 men, women and children are burned to death, training in fire prevention should not be confined to one week. It should be a daily course in every public school in the land. More thought should be given to fire prevention. This subject touches every home, every industry and every individual in our country.

Watch the Trucks

Overloaded trucks do more than anything else to destroy the highways and the highways cost the taxpayers a huge sum. To save the public highways from destruction will cost another huge and constantly growing sum. The problem to balance the relations between the railroads and commercial vehicles carrying traffic on the free highways is one that must sooner or later be solved.

GROWTH OF MAHOGANY

The observations of the conservator of forests for southern Nigeria, held to be an eminent authority in the matter, indicate that the mahogany tree grows much more rapidly than the number of so-called annual rings suggests. He thinks that they show three or four well-marked zones of growth each year, corresponding to the four seasons. Both forest trees and those grown in the botanical garden exhibit the same phenomenon. On the site of the town of Ijaye, destroyed sixty years ago, a forest has grown up containing mahogany trees with trunks exceeding ten feet in girth.

ART OF RESIGNATION

"Our friend has not sent in the resignation he was talking about."

"Not yet," replied Senator Borah. "It's terribly foolish for a man to resign from office unless he has made previous arrangements to prevent his resignation from being accepted."

TURNING IT LOOSE

"Heavens, woman. You've turned yourself into a veritable talking machine. Why, all through our long engagement you had hardly a word to say."

"I know it, but all the time I was thinking of things to say after we were married."—Judge.

NOTICE

THE FIRST NATIONAL BANK OF RICHMOND located at Richmond, in the State of California, is closing its affairs. All note holders and other claimants of the association are therefore hereby notified to present the notes and other claims for payment.

CHARLES J. CRARY, President.
Dated Oct. 7, 1922.

Note—The business and assets of First National Bank of Richmond have been acquired by Mercantile Trust Company which will conduct an office at the place of business formerly occupied by the First National Bank of Richmond.

U. C. Prof. Foresees Active Railroad Competition

In a scholarly and comprehensive survey in the University of California Chronicle for October, Professor Stuart Daggett, Dean of the College of Commerce and Professor of Railway Economics at the University, discusses the separation of the Central Pacific Railway from Southern Pacific control, as ordered by the Supreme Court's mandate of May 29. Professor Daggett analyzes the question both from a legal standpoint and as to the economic aspect of the proposed change in administrative control of the Central Pacific lines. He reaches the conclusion that the Supreme Court's mandate should be carried out and that the results which would flow therefrom would be substantially in the public interest.

The proposed separation, he says, constitutes "a step in the creation of a limited number of railway systems which can survive upon a common basis of rates, and leaves open existing channels of trade, and it preserves competition—a fundamental policy upon the soundness of which the law insists. While the subject is eminently one upon which honest men may differ, the writer sees nothing in the objections raised to the unmerger which outweigh the merits of the plan, and nothing in the alternatives suggested which are equally adapted to secure the same result."

Professor Daggett is an acknowledged authority on railway economics. He was formerly instructor on this subject at Harvard University. He is a member of the American Association of Economics, and has written, among other books, "Railroad Reorganization" and the recently published volume, "Chapters on the History of the Southern Pacific." In his article in the University of California Chronicle, Professor Daggett outlines the considerations which make desirable the separation of the Central Pacific from the Southern Pacific and a common control of the Union and of the Central Pacific Railroads, in part as follows:

"First, a merger of the two companies would make it certain, by use of the words of the Pacific Railroad acts, that the Central Pacific and the Union Pacific would be operated and used for all purposes of communication, travel and transportation, so far as the public and government are concerned, as one connected, continuous line. The Supreme Court has held that these words call for more than mere continuity of track and service, and that they make unlawful certain kinds of discrimination by one of the Pacific railroads against the other with respect to rates, time, and transportation. Congress authorized the construction of the Central and Union Pacific railroads in pursuance of a single purpose, the linking of the Missouri River with the Pacific Coast. It was not thought essential in 1862, nor is it essential now, for the two roads to be under a single corporate control in order to achieve the continuous service hoped for; such control would, however, make unlikely, once for all, any interruption in through business."

"Another reason for the transfer of the Central Pacific to the Union Pacific is that it creates a line over the Central route which will be a fair competitor to the combined Santa Fe and Western Pacific or the Burlington and Western Pacific, which students of the Transportation Act regard as advantageous western systems. Professor Ripley emphasizes this point with direct reference to his own plan for the regrouping of western lines, and his statement has force, although the considerations which support it cannot be presented here."

"A third argument for the transfer of the Central Pacific to the Union Pacific railroad is that competition for business to and from the Pacific Coast will be thereby increased. This competition is expected to express itself in a more effective utilization of the Ogden route, and since this route is properly considered to be a main route and channel of trade into and out of California, the argument applies at once the test of competition and the direction of the law with respect to the commercial requirements of the country served."

"The anticipation of increased competition in northern California as a result of the transfer of the Central Pacific to the Union Pacific is based on the fact that the transfer places the control of the former company in the hands of a corporation primarily interested in the development of traffic via Ogden instead of in those of a corporation which secures a larger profit from freight which moves out of California via El Paso than it does from traffic which moves via Ogden."

It is the irony of fate, points out Professor Daggett, that one of the clearest statements that the transfer of the Central Pacific to the Union Pacific would increase competition via the Central route is to be found in the testimony of Mr. William Sprague, president of the Southern Pacific, before the California Railroad Commission in 1912. Mr. Sprague, Professor Daggett points out, now vigorously opposes the separation on the ground that the public has nothing to gain by breaking up the properties and stands only to lose by the complications which it is alleged would follow.

California Gas Appliance Week

November 13 to 18

THROUGHOUT CALIFORNIA from November 13 to 18, Gas Appliance Week is to be conducted for the purpose of better educating the housewife in the efficient use of gas and gas equipment. The combined efforts of gas companies, gas appliance manufacturers and dealers, plumbers, hardware dealers, furniture dealers, and newspapers are behind this movement to make it one of real value to every user of gas-burning appliances.

Ask about the use of gas and gas appliances. Watch your local newspapers for announcements of special displays and demonstrations. They will be for your benefit, and worth while information will be given. Ask your dealer in gas appliances or at the local P. G. and E. office for information on any point you may not understand.

Take advantage of all that Gas Appliance Week offers.
